Superset ID: 8008209

The image shows two screenshots. The top screenshot is a Windows PowerShell 5.1 terminal window with a dark background. It displays the following text:
Compiled successfully!
You can now view studentapp in the browser.
Local: http://localhost:3000
On Your Network: http://10.224.155.74:3000
Note that the development build is not optimized.
To create a production build, use npm run build.
webpack compiled successfully

The bottom screenshot is a Visual Studio Code editor window. The Explorer sidebar on the left shows a project structure for 'STUDENTAPP' with folders 'node_modules', 'public', and 'src'. The 'src' folder is expanded, showing 'Components' with files 'About.js', 'Contact.js', and 'Home.js'. The 'Home.js' file is selected and its content is displayed in the main editor. The code is as follows:
1 import React, { Component } from 'react';
2
3 class Home extends Component {
4 render() {
5 return (
6 <div>
7 <h3>Welcome to the Home Page of Student Management</h3>
8 </div>
9);
10 }
11 }
12
13 export default Home;

On the right side of the editor, there is a 'CHAT' panel with a 'SESSIONS' list. A tip at the bottom right suggests using the 'Plan agent' to research and plan before implementing changes.
