DPP-Singleton pattern

```
1 public class Logger {
2
3
4     private static Logger instance;
5
6     private Logger() {
7     }
8
9     public static Logger getInstance() {
10         if (instance == null) {
11             instance = new Logger();
12         }
13         return instance;
14     }
15
16     public void log(String message) {
17         System.out.println("Log: " + message);
18     }
19 }
```

Console Output:

```
<terminated> SingletonTest [Java Application] C:\Users\chenn\p2\pool\plugins\org.eclipse.justj.openjdk.hotspot.jre.full.win32.x86_64.17.0.10.v20240120-1143\jre\bin\javaw.exe (05
Log: Application started
Log: Singleton Pattern Example
Only one instance of Logger is created.
```

```
1 public class SingletonTest {
2
3
4     public static void main(String[] args) {
5
6         Logger logger1 = Logger.getInstance();
7         Logger logger2 = Logger.getInstance();
8
9         logger1.log("Application started");
10        logger2.log("Singleton Pattern Example");
11
12        if (logger1 == logger2) {
13            System.out.println("Only one instance of Logger is created.");
14        } else {
15            System.out.println("Multiple instances exist.");
16        }
17    }
18 }
```

Console Output:

```
<terminated> SingletonTest [Java Application] C:\Users\chenn\p2\pool\plugins\org.eclipse.justj.openjdk.hotspot.jre.full.win32.x86_64.17.0.10.v20240120-1143\jre\bin\javaw.exe (05
