Logging using SLF4J

Exercise 1: Logging Error Messages and Warning Levels

The screenshot displays the Eclipse IDE interface. The Package Explorer on the left shows the project structure, with 'LoggingExample' selected. The main editor shows the 'LoggingExample.java' file with the following code:

```
1 import org.slf4j.Logger;
2 import org.slf4j.LoggerFactory;
3
4 public class LoggingExample {
5
6     private static final Logger logger =
7         LoggerFactory.getLogger(LoggingExample.class);
8
9     public static void main(String[] args) {
10
11         logger.error("This is an error message");
12
13         logger.warn("This is a warning message");
14
15     }
16 }
```

The Console window at the bottom shows the output of the program:

```
<terminated> LoggingExample [Java Application] C:\Users\chenn\p2\pool\plugins\org.eclipse.justi.openjdk.hotspot.jre.full.win32.x86_64_17.0.10.v20240120-1143\jre\bin\javaw.exe
22:56:43.806 [main] ERROR LoggingExample - This is an error message
22:56:43.808 [main] WARN LoggingExample - This is a warning message
```
